## HEMLOCK WOOLY ADELGID

If you suspect trees on your property have hemlock woolly adelgid, report it using the Midwest Invasive Species Information Network at [MISIN.MSU.edu](https://MISIN.MSU.edu). You can report from the field using the MISIN smartphone app, which will log the location and allow you to upload photos of the suspected signs of the insect.

You also can take pictures, note the tree's location and email the information to the Michigan Department of Agriculture and Rural Development at [MDA-Info@Michigan.gov](mailto:MDA-Info@Michigan.gov) or report by calling 800-292-3939. Someone will respond to let you know if hemlock woolly adelgid is present or not.

Please do not clip infested branch samples and transport or mail them. This could accidentally spread the insect to new areas. A [state interior quarantine](#) makes it illegal to move hemlock anywhere within or out of Allegan, Ottawa, Muskegon, Oceana or Mason counties. Currently there is no known hemlock woolly adelgid in Benzie County, as a single-tree detection was destroyed. Waste hemlock material in the quarantined counties may be moved to approved disposal sites within the quarantine zone.

For more information on identifying and managing hemlock woolly adelgid, visit [Michigan.gov/HWA](https://Michigan.gov/HWA).

*Michigan's Invasive Species Program is cooperatively implemented by the Michigan departments of Agriculture and Rural Development, Environment, Great Lakes, and Energy and Natural Resources.*
